PROFILE

Master’s student in Human-Computer Interaction with a strong background in Computational Linguistics and applied Natural Language Processing. Experienced in developing AI assistants, chatbot components, LLM-based workflows, technical text analysis, and ML platform support. Particularly interested in AI/ML text analytics, semantic retrieval, summarization, classification, human-AI interaction, and reliable deployment of NLP systems for knowledge-intensive domains.

PROFESSIONAL EXPERIENCE

OttoBock HealthCare Wien Vienna, Austria
Engineering Support / Master’s Thesis Project Jan 2026 – Jul 2026

- Developing an offline AI voice assistant for speech-based control of hand prostheses in an industrial assistive-technology context.
- Integrating automatic speech recognition, rule-based command analysis, LLM fallback logic, and Embedded Python deployment on NVIDIA Jetson.
- Designing and testing interaction flows for reliable human-AI communication in a safety- and usability-sensitive domain.
- Contributing to system integration, prototyping, and validation of AI assistant components under real-world technical constraints.

BIOCAD St. Petersburg, Russia
Technical Support Engineering Intern Jun 2024 – Dec 2024

- Analysed thousands of technical support requests using exploratory data analysis to identify recurring issue patterns relevant for NLP chatbot development.
- Supported operation, troubleshooting, and documentation of an internal ML platform.
- Contributed to technical documentation and release processes, improving clarity and consistency of internal knowledge resources.
- Worked with technical support data and internal workflows, gaining practical experience in knowledge management and AI-supported process improvement.

Speech Technology Center St. Petersburg, Russia
Natural Language Processing Intern Oct 2023 – Dec 2023

- Developed Java components for dialogue-based AI systems.
- Conducted functional and user acceptance testing for chatbot functionality.
- Gained hands-on experience with conversational AI, dialogue workflows, and practical NLP system evaluation.

EDUCATION

Paris Lodron University of Salzburg Salzburg, Austria
M.Eng. Human-Computer Interaction Oct 2024 – Oct 2026 Relevant coursework: Data Mining, Image Processing, Human Factors & Design Principles

Saint Petersburg State University St. Petersburg, Russia
B.A. Applied, Mathematical and Computational Linguistics Sep 2020 – Jun 2024 Bachelor’s thesis: *Abstractive Summarization of Russian Medical Texts with Automatic Markup of Named Entities*
Relevant coursework: Mathematical Models of Language and Machine Learning, Statistics, Information Retrieval

TECHNICAL SKILLS

Programming & ML: Python, Java, C#, PyTorch, Scikit-learn, TensorFlow
NLP & LLMs: Transformers, BERT, GPT, T5, spaCy, NLTK, summarization, named entity recognition, chatbot systems, voice interfaces, LLM fallback logic
AI Engineering & Deployment: Docker, FastAPI, Streamlit, Gradio, Google Cloud, NVIDIA Jetson, Linux
Data Analysis: Pandas, NumPy, Matplotlib, Plotly, Seaborn, Databricks, basic SQL
Interaction & Prototyping: Human-AI interaction, usability-oriented testing, embedded AI, Arduino

LANGUAGES

Russian — Native | English — C1 | German — B1+ | French — B1
